

ARGHON AIE PRESS RELEASE

For Immediate Release 12/08/2014

Arghon Artificial Intelligence Engine

mediainfo@arghon.com

Arghon Artificial Intelligence Engine expands into Australian market

Versure Inc., a New York based technology company specializing in artificial intelligence (AI) solutions for consumers and businesses, expands into the Australian market. With powerful tools, like the Arghon Ecosystem, the AI powered virtual assistant already serves users in Canada, the US, the UK, and now Australia. The lifestyle enhancing application, available on Blackberry and Android devices, provides Arghon users with access to extensive knowledge of people, places, and things. Arghon provides reminders and everyday information such as sports scores, weather, and local amenities from your mobile phone. Aussie “foodies” can now have two-way interactions with restaurants in Arghon and ask for directions. Arghon users can research worldwide trivia and facts using the free Arghon AIE app.

“The Australian market is important. We look forward to growing our products and services in the region over the coming years,” said CEO, Collie Brown. “Australian businesses can now use Arghon’s Ecosystem to provide advanced services to Australian consumers.”

Since its inception in 2005, the company has been on a mission to harness technology solutions that improve the everyday quality of life for adults and students. Versure Inc.’s CEO, Collie Brown, and his team acknowledge the significance of the Australian rollout. This expansion moves the Arghon team towards their objective of globally servicing users in business, education, healthcare, and many other sectors.

About the company

Versure Inc. is a privately held software company based in New York. Their flagship product, Arghon, is a virtual assistant powered by an artificial intelligence engine. Arghon assists you in your everyday tasks by creating helpful reminders, answering questions, booking doctors' appointments, planning events and much more. Over the past year, the company has rolled out major releases of Arghon in the US, Canada, and the UK, enhancing functionality with each release.
